March 15 1906

Dear Captain Peter Baynton

I'm writing in regard
to this proposed liquefied
Natural Gas Facility they
want to build our H.I. Sound
I'm very much against it.

Hope you are also, I would
like to hear about your ~~thought~~
thoughts on this situation

I Thank you

Your Truly
Phyllis Batto

NewHaven, CT 06512

I am writting this letter to indicate that I am apposed to the proposed liquefied natural gas facility being considered to be built nine miles of Rocky Point. I believe the location of the facility would be enviornmentaly detromental to the recreational aspects of Long Island Sound and would negatively effect puplic access to the area. In addition I think it would create an easy target for terrorists.

I hope that you give this matter your most serious consideration, and would appreciate a written response.

Thankyou

John J. Buonsante

MAR 29 2006

Dear Captain Boynton -

Thanks for reading this.

We do not want the "Broadwater"
- project built IN Long Island
Sound. (Liquefied natural gas facility by shell oil)

The Sound is not for sale.

I already paid for it with
my property taxes!

Why don't boat engines have a
catalytic converter type device to
reduce pollution?

Thanks for watching over our
beautiful waterways - keep 'em beautiful!

MAR 29 2006

Dear Captain Peter Boynton

I'm writing regarding the proposed LNG facility proposed for Long Island Sound. I'm deeply concerned about the environmental impact and safety of this plant. Long Island sound is vitally important to all that live near it. We have spent a lot of our tax dollars to protect it and to clean it up. It would be a shame if it were to be destroyed by this facility. My friend can longer fish for lobster in the sound because he blames the use of larvicide's used to control west Nile virus destroyed his livelihood. You cannot safely eat Striped bass from the Hudson because the PCB levels are so high in them due to GE. We cannot tolerate this any longer please do not allow this to happen.

Thanks
Anthony DeMarco

MAR 29 2006

A Special Note —
Captain Peter Boyton

L.N.C. Facility endangers the
health & safety of Long Island
Sound & should not be
built.

The Sound has been a
source of joy, a wonderful
place for boating, swimming,
fishing.

Mrs Gloria Tidangato
220 Fifth St
Manh N.Y., 10543

To Captain Peter Boynton,

New York state needs renewable energy. Liquefied Natural Gas (LNG) is a fossil fuel - NOT a renewable form of energy. Investing about \$7 million to construct a 400 foot long LNG facility runs counter to New York's efforts to reduce our reliance on environmentally destructive fossil fuels. Natural gas, like all fossil fuels, experiences price fluctuations, which are based on the market. Natural gas does not provide cheap electricity and is a direct competitor of renewable technologies. This facility will disrupt the Long Island Sound's shipping traffic, aesthetic appeal, commercial industry, public recreation, and biological life including multiple endangered species. The tri-state area does not support this facility... neither should you.

Sincerely,

Katherine Fitzer

March 14, 2006

Captain Peter Boynton:

I have recently learned of the proposed natural gas facility in the long island sound. I am concerned that the industrialization of the sound will put more pressure on the already struggling ecosystem. My family and I sail and fish in the summer months and the sound is an important part of our community here in Mamaroneck NY. I believe if the environmental and safety issues of this project are carefully evaluated they will far out weigh any potential financial gain. It should not be built.

Sincerely,
Jenzpher Finkenberg

Dear Captain Boynton,

It has come to my attention that a proposed Liquefied Natural Gas Facility has been proposed to be built in the Long Island Sound. This facility does not belong in the Long Island Sound. A Liquefied Natural Gas Facility endangers the health and safety of the Long Island Sound and it should not be built. This facility, if built would limit public access to the sound and as a resident of Long Island and a boater I strongly suggest that it should not be built.

Thank you for your immediate attention to this matter.

Sincerely,

To whom it may concern, MAR 29 2006

It is my own interest as a resident of the Long Island Sound area, to inform you of my opinion on Project Broadwater. I am a fisherman, who enjoys the environment in and around the sound. The LNG facility proposed is an immediate danger to the preservation of the L.I.S. This facility would also limit the accessibility for fishermen/women, boaters, sailors, etc. Thank you for your time.

New Haven, CT 06512

Captain Boynton, US Coast Guard,

I am writing to prevent Broadwater venture from building a proposed liquefied Natural gas facility nine miles off Rocky Point in the middle of the Long Island Sound. As a local resident and an avid recreational boater and fisherman of the Long Island Sound for the past 23 years, I feel this project would be detrimental to the waterway. It is a potential risk to the health and safety of the Sound and a threat to its ecosystem. It will limit public access to boaters and sets a dangerous precedence of industrializing our waterway.

Please send an official response to my address above regarding your position on the matter.

Thank you for your time.

Sincerely,

Jason Garcia

Dear Captain Boynton,

My name is John Gowan. I am writing to you to express my opposition to the proposed Liquefied Natural Gas facility which is being considered for development in Long Island Sound.

My father was a graduate of Kings Point and served in the Merchant Marine during World War II. He then went on to work in the shipping industry after the war. He often spoke of the dangers of LNG technology. In this day and age of terrorist attacks I feel that this type of solution to our energy needs is dangerous and short-sighted. While I acknowledge the need for the development of new energy sources, this type of concentrated mega-project is not the answer. The development of many small-scale decentralized sources of energy are far safer and practical in the long term. The plan for the LNG facility in Long Island Sound is not only environmentally unsound (no pun intended), but it is not a viable solution to our long-term energy needs.

Please feel free to let me know your thoughts on this matter. Thank you for your attention.

Sincerely,

New Haven, CT 06512

Dear Captain Boynton,

It has come to my attention through the wonderful efforts of the Citizens Campaign for the Environment, that a liquefied natural gas facility is being planned just nine miles off Rocky Point in the Long Island Sound.

I support the Citizens Campaign and ask that your commission reconsider this project "Broadwater", as such a facility will endanger the health and safety of Long Island Sound and should not be built.

Sincerely,

Jacqueline Corbitt Guglielmo

To Whom it May Concern;

I am writing to express my concern over the proposal to place a liquefied natural gas facility in the Long Island Sound. Not only would this facility limit public access to the Sound but it would endanger both the health and the safety of the Sound itself and those who live near it. Please do everything in your power to keep the Long Island Sound safe for generations to come.

Thanks in advance for all your help.

Sincerely,

Fiona Lagani

MAR 29 2006

I wish to start off by saying that for years me and my husband have enjoyed the sound in the summer. We take long boat rides as often as possible and hope one day to pass this tranquil and beautiful time to our children. It seems as if the LNG FACILITY ENDANGERS THE HEALTH AND SAFETY OF LONG ISLAND SOUND AND SHOULD NOT BE BUILT. I would hate to live in an era where I am only able to tell my children stories of how wonderful the waters use to be. Please respond in writing to my concerns and your efforts to stop this travesty from happening.

Thank you for your time

MAR 29 2006

Dear Sirs and Madam:

It has come to my attention that a prototype LNG Facility has been proposed for the waters of Long Island Sound. This strikes me as a ludicrous idea, considering our lack of market demand given the recent approval of facilities in Boston and Canada. Long Island Sound is a publicly supported water body, vital to the continued existence of over half of our region's endangered species. Why on earth would our public officials approve a facility that serves only to line the pockets of a foreign fossil fuel provider, when our state has approved a renewable energy portfolio, and numerous tax expenditures to preserve the health of Long Island Sound? This makes absolutely no sense to me. Please write me back, addressing my concerns.

Most Sincerely,
Guy Mason

MAR 29 2006

March 17, 2006

To Captain Peter Boyton:

The liquefied natural gas facility should not be constructed in the Long Island Sound. It is a recovering natural resource and by constructing this facility it will only bring an unhealthy and dangerous situation for us all. The sound is a beautiful location and I would like it to remain as such. I would also want my children to enjoy it as well. Please reconsider your plans.

Sincerely,

March 15, 2006

Captain Peter Boynton
US Coast Guard
Commanding Officer,
Group/MSO Long Island Sound
120 Woodward Avenue
New Haven, CT 06512

Captain Boynton,

My husband and I are writing a letter in the hopes that you make the best choice for our environment. This would involve not allowing for a liquefied natural gas facility in our Long Island Sound. As a science teacher I believe money would be better invested in alternative, renewable resources like solar energy. Natural gas is a resource that may not be depleted before the end of my lifetime, but might be during the lifetime of our children. Why should we jeopardize the ecosystem, while we are looking at a 'short term' gain for this energy industry?

I am of a third generation raised in Mamaroneck, and my husband and I are fortunate to be able to raise our children here. It is our hope that they will appreciate the beauty of the sound. This will only occur if we act to reduce pollution and promote, not just sustain, the levels of aquatic life in the sound.

As I have unfortunately witnessed during my 38 years, runoff pollution has closed many beaches in my community. What used to be public beaches with little space to spread a blanket, are now beginning to see increasing numbers of visitor throughout the summer (nothing like it was during the '70's). Harbor Island Beach is now 'safe' to beach-goers, after years of studies and current procedures involving gunderbooms and citing those that are the sources of pollution. Local government officials are becoming more active in reversing the process of what many years of neglect and ignorance have caused.

Again, we hope that you will not allow for a liquefied natural gas facility in our neighboring Long Island Sound. Our community is not one to turn a blind eye to protecting our environment, education enables us the foresight to prevent damage to our surroundings - of which we are merely caretakers. Hopefully, our educated officials will not allow for industry and economics prevail over the health of our environment which will affect us all.

Respectfully,

Susan Evangelista Moore

Dear Ms. Salas,

We enjoy living in walking distance of Long Island Sound. We gaze at it, breath in the salty air and sometimes dip in a toe.

We wish we could swim in clean salt water here in our backyard like we did as children in the 1960s.

If the LNG facility endangers the health and safety of Long Island Sound, then it should not be built.

Keeping in mind that frequent beach closings due to sewage leakage also endangers our health.

What can you do so that we can once again swim in the Long Island Sound?

Thank you for your concern and efforts.

Sincerely,

Kelly & John Susa

MAR 29 2006

March 10, 2006

Dear Captain Peter Boynton:

I am writing to inform you of how disgusted I am that as a citizen living in one of the highest taxed communities in the United States that you would even think of putting a Liquefied Gas Facility in the Long Island Sound. This would endanger the health and safety of the Long Island Sound, the people living in and around the Sound and should not be built. This facility would limit public access and sets a dangerous precedent of industrializing an already over industrialized region with many safety and health issues as it is. The money would be better spent on alternate forms of energy and other locations. With Long Island getting only 1/5th of the energy it is outrageous that we should risk our own communities in carrying the facility.

Thank you for your attention in this matter.

Very truly yours,

Soraya Zahn-Rogers
